

OPUS SMALL CAP VALUE PLUS ETF (OSCV)
(the “Fund”)

May 1, 2019

**Supplement to the
Summary Prospectus dated July 16, 2018**

Effective immediately, Len Haussler and Adam Eagleston, the Fund’s portfolio managers, have joined Driehaus Capital Management LLC (“Driehaus”) as portfolio managers, and Driehaus has become the sub-adviser to the Fund. Messrs. Haussler and Eagleston will continue to be responsible for the day-to-day management of the Fund. All references in the Summary Prospectus to the Fund’s previous sub-adviser, Opus Capital Group, LLC, doing business as Opus Capital Management, should be disregarded.

Please retain this Supplement with your Summary Prospectus for future reference.

Listed on NYSE Arca, Inc.

www.opusetfs.com

Before you invest, you may want to review the Opus Small Cap Value Plus ETF's (the "Fund") statutory prospectus and statement of additional information, which contain more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated July 16, 2018, are incorporated by reference into this Summary Prospectus. You can find the Fund's statutory prospectus, statement of additional information and other information about the Fund online at www.opusetfs.com. You can also get this information at no cost by calling 1-800-617-0004 or by sending an e-mail request to ETF@usbank.com.

Investment Objective

The Opus Small Cap Value Plus ETF (the "Fund" or the "Value Fund") seeks capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund ("Shares"). This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Shares.

| | |
|--|--------------|
| Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i> | |
| Management Fees | 0.79% |
| Distribution and/or Service (12b-1) Fees | None |
| Other Expenses* | 0.00% |
| Total Annual Fund Operating Expenses | 0.79% |

* Estimated for the current fiscal year.

Expense Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

| 1 Year | 3 Years |
|--------|---------|
| \$81 | \$252 |

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund ("ETF") that invests under normal circumstances at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities of small-capitalization U.S. companies. The Fund defines a small-capitalization company as an issuer whose market capitalization at the time of purchase is in the range of those found in the Russell 2000® Index.

The Fund's sub-adviser selects stocks across a variety of sectors and industries for the Fund by combining factor-based analysis with rigorous fundamental research to identify high-quality, growing companies that the sub-adviser believes are undervalued. The sub-adviser focuses on three core themes to identify companies for the Fund:

| | |
|-----------------------|---|
| <i>Higher Quality</i> | Companies with sound business models, higher returns on equity, strong balance sheets, and shareholder-friendly management. |
| <hr/> | |
| <i>Higher Growth</i> | Companies that are well-positioned to grow sales, earnings, cash flows, and dividends. |

| | |
|------------------------|--|
| <i>Lower Valuation</i> | Companies whose valuations reflect lower price-to-earnings and higher yields than their peers. |
|------------------------|--|

The Fund's sub-adviser generally sells a stock for the Fund when the company is no longer believed to be high quality, when its anticipated growth rate has significantly declined, when it is no longer considered undervalued, or when it is no longer considered a small-capitalization company after a significant period of time (e.g., more than one year).

The Fund will primarily invest in common stocks and real estate investment trusts ("REITs").

Principal Investment Risks

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus, titled "Additional Information About the Funds — Principal Investment Risks."

- **Equity Market Risk.** The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. The trading prices of equity securities and other instruments fluctuate in response to a variety of factors. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.
- **ETF Risks.**
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Trading.* Although Shares are listed for trading on the NYSE Arca, Inc. (the "Exchange"), a national securities exchange, and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Management Risk.** The Fund is actively-managed and may not meet its investment objective based on the sub-adviser's success or failure to implement investment strategies for the Fund.
- **New Fund Risk.** The Fund is a recently organized, diversified management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **REIT Investment Risk.** Investments in REITs involve unique risks. REITs may have limited financial resources, may trade less frequently and in limited volume, and may be more volatile than other securities. The risks of investing in REITs include certain risks associated with the direct ownership of real estate and the real estate industry in general. Securities in the real estate sector are subject to the risk that the value of their underlying real estate may go down. Many factors may affect real estate values, including the general and local economies, the amount of new construction in a particular area, the laws and regulations (including zoning and tax laws) affecting real estate, and the costs of owning, maintaining and improving real estate. The availability of mortgages and changes in interest rates may also affect real estate values. REITs are also subject to heavy cash flow dependency, defaults by borrowers, and self-liquidation.
- **Sector Risk.** To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors.
- **Shares May Trade at Prices Other Than NAV.** As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.

- **Small Capitalization Companies Risk.** The Fund invests in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.
- **Value-Style Investing Risk.** The value investing style may over time go in and out of favor. At times when the value investing style is out of favor, the Fund may underperform other funds that use different investing styles.

Performance

Performance information for the Fund is not included because the Fund did not have a full calendar year of performance prior to the date of this Prospectus. In the future, performance information for the Fund will be presented in this section. Updated performance information is available on the Fund’s website at www.opusetfs.com.

Management

| | |
|-------------------------------|---|
| <i>Investment Adviser</i> | Aptus Capital Advisors, LLC (the “Adviser”) |
| <i>Investment Sub-Adviser</i> | Opus Capital Group, LLC, doing business as Opus Capital Management (“Opus” or the “Sub-Adviser”) |
| <i>Portfolio Managers</i> | Len Haussler, Opus Founder and Portfolio Manager, and Adam Eagleston, Opus Principal and Portfolio Manager, have been portfolio managers of the Fund since its inception in 2018. |

Purchase and Sale of Shares

Shares are listed on a national securities exchange, such as the Exchange, and most investors will buy and sell Shares through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only Authorized Participants (“APs”) (typically, broker-dealers) may purchase or redeem. Creation Units generally consist of 25,000 Shares, though this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser, Opus or any of their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
